- Single Page Application with AngularJS
- Gulp Grunt.

BBA Logistics Project

Web Development – Eztek Software Company 5/2016 – 10/2016

BBA Logistics Pty Ltd (BBA) was founded by identifying a gap in the freight & logistics market, where the current landscape of technology solutions lacked comprehensive, simple to use functionality. BBA was born to provide businesses the ability to solve this problem as well as identifying a unique logistics solution, named break bulk, which the software automates for customers both domestically and internationally.
http://dashboard.bbalogistics.com.au/

My role and responsibilities were as follows:
